THIS YEAR 1.8 MILLION PEOPLE WILL DIE DUE TO WATERBORNE DISEASE – THE MAJORITY ARE CHILDREN.

THE STRAW

3 CHARCOAL FILTER

Water passes through the final charcoal grates, removing any bad tastes and providing fresh, safe water.

2 IODINE CRYSTALS

Next, the water passes through an iodine filtration system to eliminate diseases.

1 MEMBRANE FILTERS

When the straw hits the water the first chamber filters particles, membranes and molecules.

Imagine a small, portable filtration straw that hangs around a child's neck that guarantees them clean drinking water for a year, wherever they are. This purification straw, proven effective against waterborne diseases, acts as a filtration tool that cleanses impure water, no matter how unsanitary it may be.

There is no life without water. Join WaterIsLife today in providing these water-straw filters to thousands of children all over the world.
